EMPLOYMENT

JotForm, İstanbul – *Software Engineer • August 2023 - Current*

- Developing and enhancing a data visualization project using **React.js**, **highcharts.js**.
- Rewrote the editor page of the project, adding new features on top of its existing version. Used **monaco-editor** to edit the project's JSON structure.
- Implementing various **calculation tools** outside of the team's dashboard.

Akinon, Remote/Full Time – *Software Engineer • June 2023 - August 2023*

- Developed **Web Components** written in **Pure JavaScript** and updated them based on customer requests.
- Fixed frontend bugs of many major **e-commerce sites** in Turkey together with the team.
- Conducted task allocation using **Agile management** with the team via **Jira**.

JotForm, Remote/Part Time

– *Frontend Support Engineer • October 2022 - May 2023*

- Fixed bugs in many **live products** on JotForm.
- Contributed to solving bugs by **communicating** with customers one-on-one and understanding their problems.

– *Frontend Developer Intern • June 2022 - September 2022*

- Developed 'frontend-gui' (a full-stack project) where you can **manage** (run, stop, build, checking build size) frontend mono-repo projects in-house with a UI instead of a CLI.

Upwork, Remote/Freelancer – *Junior Software Engineer • March 2022 - August 2022*

- While studying at school, I took a project from Upwork called [Odincity](https://www.odincity.com), where developments were made using React.js.

Saypr, Remote/Full Time – *Junior Software Engineer • March 2021 - October 2021*

- Development using **React.js**, **Next.js**, **CSS/SCSS**, **JavaScript** technologies.
- Front-End part **responsive development** of **Figma** design using **Next.js**.
- Website development for the [CabinPanda](https://cabinpanda.com) Data collection platform using **React.js**, **Git**, **Bitbucket** and **Trello** as a team.
- Front-end development of the promotion website for [Riot Forge Games](https://riotforgegames.com) using **Gatsby.js**, and **SCSS**.
